Spring 2018

THE SMALL ONE WITH WOW FACTOR!

Practical, compact, yet lots of storage space: the PARACURV® Multifunctional tool bag impresses as a real space miracle with integrated lamp holder.

The ideal tool bag has to be one thing: perfectly tailored to the customer's needs. And that's why PARAT, as a market leader in tool cases, combines the most different features for one particular use to suit any individual requirement. That way, unique products such as the PARACURV® Multifunctional shoulder bag evolve.

PARAT combines tool bag and lamp holder for the first time: The PARASNAP® Base, fixed to the side of the bag, attaches to any PARASNAP® mount. These certified lamp mounts, developed by PARAT, allow you to mount different types of safety lamps with a mere flick of the wrist – for a perfectly illuminated working area.

The 'Small One' by PARAT has also been specifically designed for users who can only carry a little luggage when on the job, but still want to have all necessary tools with them to carry out the most important tasks: despite its compact size, the high-quality shoulder bag offers generous space inside with a capacity of about ten liters and an extremely light empty weight of just 1,000 grams. The storage system inside the bag is fitted with approximately 17 pockets to stow away lots of tools.

Good tools need a good handling: to guarantee that nothing will be lost during operation, the bag can be easily opened and closed with just one hand – thanks to the patented PARALOCK® magnetic lock by PARAT, which engages automatically. The adjustable shoulder strap allows you to conveniently carry the premium tool bag on your shoulders, which keeps your hands free and makes transportation a pleasant experience.

The multifunctional PARACURV® tool bag is not only practical, but also looks good: the exclusive CURV® shell wows customers with its excellent workmanship and appealing surface and stands for highest robustness and durability.
