PROTECT-LINE

PROTECTION AND ORDER TO THE 10th POWER

The new protective case line PROTECT by PARAT

PARAT expands its protective cases portfolio with ten extremely robust products. Never has it been safer to neatly store and transport valuable tools.

Protecting, organizing and transporting: these are the strongest suits of the PROTECT-LINE, the new protective case series by PARAT. The well thought-out and enormous robust case body is made from polypropylene and reliably defies shocks, dust and water. Your devices and tools are well protected from any external conditions, whether heat, cold, rain, snow or hail. Received certifications according to IP67, STANAG 4280, DEF STAN 81-41 as well as NATO codification (NSN) are proof of this. In addition, the case interior can be exactly tailored to your specific needs – choose from individual interior fittings such as pre-cut foam inserts to create your very specific storage design or sewn separators for easy arrangement of your tools. With everything properly stowed away, the protective cases will be sent out on their journey – without great effort on wheels, with telescopic handle and comfortable carrying handles.

SAFETY, VERSATILITY, FLEXIBILITY: PRODUCT BENEFITS OF THE NEW PROTECT-LINE

THE PERFECT SIZE FOR YOU

Whether space saver or compact companion: The cases from the PROTECT-LINE are available with a capacity from 20 to 71 liters. This way, lots of small parts but also bulky working materials find their proper place.

SECURELY STOWED AWAY, SECURE IN ALL RESPECTS

A dream come true for neatniks: When choosing pre-cut foam inserts, custom-fit storage of your devices is always guaranteed. For all-round protection, even the case bottom and lid are lined with foam material in order to provide tight and firm fit during transport for your most sensitive tools and measuring instruments.

EVERYTHING IN VIEW

It does not always have to be pre-cut foam: The PROTECT S models offer an individual and versatile storage management thanks to removable and lockable pockets with tool boards inside. Push-in compartments and loops additionally guarantee strong hold, overview and quick access to your tools.

SHOCK-RESISTANT AND WATER-PROOF

Sturdy, sturdier, polypropylene: External influences of any kind cannot affect the PROTECT case from outside and neither your tools inside. Even water and dust are nothing to worry about – thanks to an integrated all-round sealing.

CONVENIENT AND SAFE WHEN ON THE GO

With ease from A to B: Integrated castors enable convenient transport of your case, whether on plain roads or on rugged terrain. Two carrying handles with soft-touch surface and a telescopic handle additionally make for comfortable handling. Arrived at their destination, the case models from the PROTECT-LINE can be easily stacked.
